**Adapted from USDA NRCS Information*

EXAMPLE:
At 1 foot of pressure

- A 5/8" hole delivers **5.0 GPM**
- A 7/8" hole delivers **9.8 GPM**

VISUAL GUIDE:
Pressure in feet

- **Oval Shaped:** Polytube at 0.5 to 1.5 feet of pressure.

- **Round / Tight:** Polytube at 1.5 to 3.0 feet of pressure.

- **Ruptured:** Polytube at 3.0+ feet of pressure is probably ruptured or close to it.
